ABOUT US

Handcrafted from solid brass in our original London workshop since 1905, each Barber Wilsons tap bears the mark of true craftsmanship, a promise of skill, and lasting quality that has endured for over 120 years.

Our company began in 1905, in a small workshop in Wood Green, North London. 120 years on, we're still here, still on the very same site, and still making every tap by hand, just as we always have.

Step inside our factory today and you'll find a team of skilled craftsmen using many of the same tools and techniques passed down through the decades. Every piece is made from solid brass, shaped, assembled, and finished by hand. Not for ease, but because we believe it's the best way. This is how we've always worked, and why Barber Wilsons' products have earned their reputation for lasting quality.

Alongside new designs, we continue to produce original models from our archives, not reproductions, but the very same patterns first created over a century ago. These designs remain as relevant today as ever: practical, enduring, and thoughtfully made.

This catalogue marks our 120th anniversary, not just a celebration of the years behind us, but a reminder of the principles we started with in 1905, which remain at the heart of everything we do today. We hope you enjoy exploring it.

A history of specialising in specialities

Barber Wilsons is the oldest independent, family-owned company manufacturing water fittings in the United Kingdom. Spanning three centuries, we have offered classic style with outstanding quality and today remain a prestige brand-name sought after by thousands of designers and consumers across the UK and beyond.

Founded originally in 1899, the business began from a small factory on what was to grow into the Crawley Road headquarters where it remains today. A highly skilled workforce was employed for the firm's foundry, with many of our team remaining with us for over 40 years, passing on their skills and knowledge to younger generations.

The company has been involved in multiple prestigious refurbishment projects from world renowned hotels such as Claridge's and the Savoy to private clients, which include the Royal Households. Queen Elizabeth II is just one of the many who appreciated our brassware and honoured the company with a Royal warrant.

After a century 'specialising in specialities' Barber Wilsons & Co are proud to have involved four generations using traditional skills and the highest quality materials to continue supplying the very best luxury taps and bathroom fittings.

Our craftsman share knowledge and skills second to none

Long before sustainability became a global concern, Barber Wilsons was quietly building a circular business. Since 1905, we have created products that are timeless in design and enduring in strength, crafted to last for generations—not discarded after a few years. Made to order in our UK workshop from solid, lead-free brass—100% of which is already recycled—our fittings avoid surplus stock and embrace responsible material use. We recycle all brass swarf, and even our sample discs are reclaimed from shower valve waste. True to our founding philosophy, we believe in mending rather than replacing. That's why we've always offered a full refurbishment service, no matter the product's age, and always will. By restoring and reusing, we not only extend the life of our products but also reduce waste and promote a culture of care. Sustainability, for us, is a natural outcome of thoughtful design, expert craftsmanship, and an enduring commitment to do things the right way.

Long before global warming and sustainability became an area of concern, we were creating products that were both timeless in design and enduring in strength. It is this uncompromising approach to design and craftsmanship, that makes us completely circular.

We believe in mending instead of replacing, because of this we offer a refurbishment service to customers, no matter the age of the product. Our business was founded on this philosophy which means we will continue to offer this service for as long as we exist. By doing so, we not only extend the life of our products but also minimize waste and promote a culture of care and responsibility towards the environment.

Every piece is made to order, avoiding surplus stock, and produced entirely in the UK using solid, lead-free brass—an endlessly recyclable material, 100% of which is already recycled. We recycle all brass swarf from our workshop, and even our sample discs are reclaimed from waste materials within our own manufacturing. Sustainability is a journey, and we are constantly exploring new ways to reduce our impact while upholding the high standards of quality and care that define us.

THE REGENT COLLECTIONS

Forged at the very beginning of the Barber Wilsons story, this elegant range is still crafted much as it was in the 1890s and early 1900s. Each stage of production presents its own challenges and demands the skill, care, and determination of our team to bring it to life.

We believe this traditional process gives the product its soul, resulting in something that feels alive in the hand: solid, reassuring, and a true reflection of a time when the only goal was to make things that last.

Regent Basin Taps & Mixers

This page shows the different finish pricing groups used across all our ranges. Each finish falls into Group 1, 2 or 3, which determines the price of the product. There is also a breakdown of the available customisations, from handle styles and shield designs to indice text and lever finishes. Each option includes a code which is needed when ordering from the factory. Please see page I90 to learn how to formulate these codes.

Regent Bath Taps & Mixers

This page shows the different finish pricing groups used across all our ranges. Each finish falls into Group 1, 2 or 3, which determines the price of the product. There is also a breakdown of the available customisations for Regent bath taps, from handle styles and shield designs to bath braces and lever finishes. Each option includes a code which is needed when ordering from the factory. Please see page I90 to learn how to formulate these codes.

FINISH PRICING GROUP 1

Regent Showers

This page shows the different finish pricing groups used across all our ranges. Each finish falls into Group 1, 2 or 3, which determines the price of the product. There is also a breakdown of the available customisations for Regent showers, from handle styles and shield designs to rose size and lever finishes. Each option includes a code which is needed when ordering from the factory. Please see page 190 to learn how to formulate these codes.

Regent Kitchen Taps & Mixers

This page shows the different finish pricing groups used across all our ranges. Each finish falls into Group 1, 2 or 3, which determines the price of the product. There is also a breakdown of the available customisations for Regent kitchen taps, from handle styles and unions to indice text and lever finishes. Each option includes a code which is needed when ordering from the factory. Please see page 190 to learn how to formulate these codes

THE MASTERCRAFT COLLECTION

The original headworks for this collection were sketched out by Dame Bridget D'Oyley – Carte at the Barber Wilsons factory, in the late 1920's. A pioneering figure, she personally oversaw the interiors of both the Savoy and Claridge's, then part of her father's renowned hospitality empire.

It is with great pride that we continue to produce not a reproduction, but an original design—one that helped define the sleek lines and bold geometry of the Art Deco era. Our fittings remain in Claridge's to this day, having played a part in every refurbishment of the iconic hotel since the 1920s.

Mastercraft

This page shows the different finish pricing groups used across all our ranges. Each finish falls into Group 1, 2 or 3, which determines the price of the product. There is also find a breakdown of the available customisations, from handle styles and shield designs to indice text and lever finishes. Each option includes a code which is needed when ordering from the factory.

THE MILNE COLLECTION

The Milne Collection is our newest range in a long tradition of exceptional British craftsmanship. The collection features our core Milne design, with beautifully engineered spouts and showers that reflect our commitment to timeless design and quality.

Alongside this sits Milne Editions, a refined tubular interpretation created to complement the core collection. First used in the recent refurbishment of the iconic Claridge's Hotel, Milne Editions continues our longstanding tradition of collaborating with the world's most prestigious establishments.

Milne & Milne Editions

This page shows the different finish pricing groups used across all our ranges. Each finish falls into Group 1, 2 or 3, which determines the price of the product. There is also a breakdown of the available customisations, from handle styles to spout designs. Each option includes a code which is needed when ordering from the factory.

Our Finishes

We offer 18 distinctive finishes across our entire product range, each designed to suit a variety of interiors and tastes. All non-brass finishes are expertly plated over the highest quality solid brass, ensuring durability and a premium feel.

Our finishes are grouped into three categories; Living, Established, and Enduring, each offering a unique aesthetic and ageing process. Whether you prefer a patinated, time-worn look or a crisp, long-lasting appearance, our finishes are crafted to age gracefully and beautifully within their environment.

On the following pages, you'll find detailed descriptions and images of each finish, helping you choose the perfect finish for your space.

‘LIVING’ FINISHES

Over time living finishes can tarnish, patinate and expose base colours. The change in appearance will depend upon the environment and conditions in which products are kept and used. All non-brass finishes are plated over the highest quality solid brass, and while we believe the quality of our finishes is superior, no product can be guaranteed to keep the original factory finish. What we can guarantee is that both our unlacquered and waxed living finishes create a beautiful patina, loved by customers who want an aged or ‘vintage’ look.

‘ESTABLISHED’ FINISHES

Over time, established finishes may change in appearance but if cleaning instructions are followed, they will retain a sharp and pristine appearance for longer than our living finishes.

‘ENDURING’ FINISHES

When traditionally produced, these specific finishes were susceptible to staining and marking so in line with our commitment to continually advance the quality of our finishes, we have developed ‘enduring finishes’. These finishes are now created to have a stable, long-lasting quality while retaining their unmistakable beauty and tone. If cleaning instructions are followed, products will maintain a close-to-factory finish for many years to come.

PB

POLISHED BRASS

Unlacquered, Polished Brass starts out with a highly polished factory finish but naturally ages and patinates over time. Alternatively, if care instructions are followed the bright, polished appearance can be maintained.

BB

BRUSHED BRASS

A waxed finish, Brushed Brass is hand brushed to create a distinct texture and matte appearance. Over time, this finish will mark and develop a characterful patina. Follow care instructions to maintain the original finish.

WB

WEATHERED BRONZE

Weathered Bronze is deeper in colour than our matt bronze finish but lightens over time to a rich, antique bronze. High contact areas, such as handles and edges, will reveal copper undertones. Please note, this finish is quick to degrade.

MB

MATT BRONZE

Matt Bronze is an antique finish created through the galvanic oxidation of brass. The ageing process reveals the natural brass base through the darker coated surface, exposing attractive lighter tones. Please note, this finish is quick to degrade.

EMB

ENDURING MATT BRONZE

Rich in tone, Enduring Matt Bronze gives warmth and depth to any product. Smooth to the touch, this finish emulates the rich feel of genuine bronze. This finish is stable and will maintain its factory look and feel for many years to come.

BLK

ENDURING BLACK

Enduring Black is achieved by applying deep layers of pigment-rich minerals to a brass base, resulting in a smooth, matte finish. This is a stable finish and will maintain its factory look and feel for many years to come.

NI
POLISHED NICKEL

Polished Nickel is an unlacquered finish with a warm, golden undertone and a deeper tone when compared to chrome. Over time, this finish may slightly patinate and deepen in colour.

SNI
SATIN NICKEL

Satin Nickel offers a smoother finish compared when to polished nickel. It is created by layering a matt nickel finish over a nickel base, resulting in a warm, rich tone.

BNI
BRUSHED NICKEL

A rich, textured finish, Brushed Nickel is dipped with a double nickel deposit, then hand brushed to create fine lines on the metal, leaving a matte appearance with a subtle grain.

PG
POLISHED GOLD

An unlacquered finish, Polished Gold closely resembles plated gold and naturally develops a patina over time. Since this is one of the softest finishes, care needs to be taken when cleaning.

SG
SATIN GOLD

Satin Gold has a smooth, low-lustre appearance. This finish starts out with a hand dipped satin nickel base before a gold finish is applied. Depending on environment this finish will deepen in colour over time.

BG
BRUSHED GOLD

Brushed Gold is first dipped in a nickel deposit, then hand-brushed before layers of gold are applied. The result is a warm, glowing finish that gradually deepens in colour over time.

CP
POLISHED CHROME

Hand-polished and unlacquered, Polished Chrome features a bright, cool hue with a subtle blue undertone. This finish is the most stable of all and is the least likely to deepen in colour over time.

SCH
SATIN CHROME

Satin Chrome is achieved by applying a soft, matt chrome layer over a chrome base. Cool in tone, this finish has a rich texture but a subtle surface grain when compared to brushed chrome.

BCH
BRUSHED CHROME

Brushed Chrome features a chrome-plated topcoat that undergoes a hand brushing process, followed by a polishing to smooth the surface. The result is a matt, cool-toned finish.

PI
POLISHED INCA

An unlacquered finish, Polished Inca is cooler in tone when compared to our brass and gold finishes. Since this is one of the softest finishes, care needs to be taken when cleaning.

SI
SATIN INCA

Satin Inca is deeper in colour than polished inca but offers a soft, pearlescent sheen that is smooth to the touch. This finish will deepen in colour over time.

BI
BRUSHED INCA

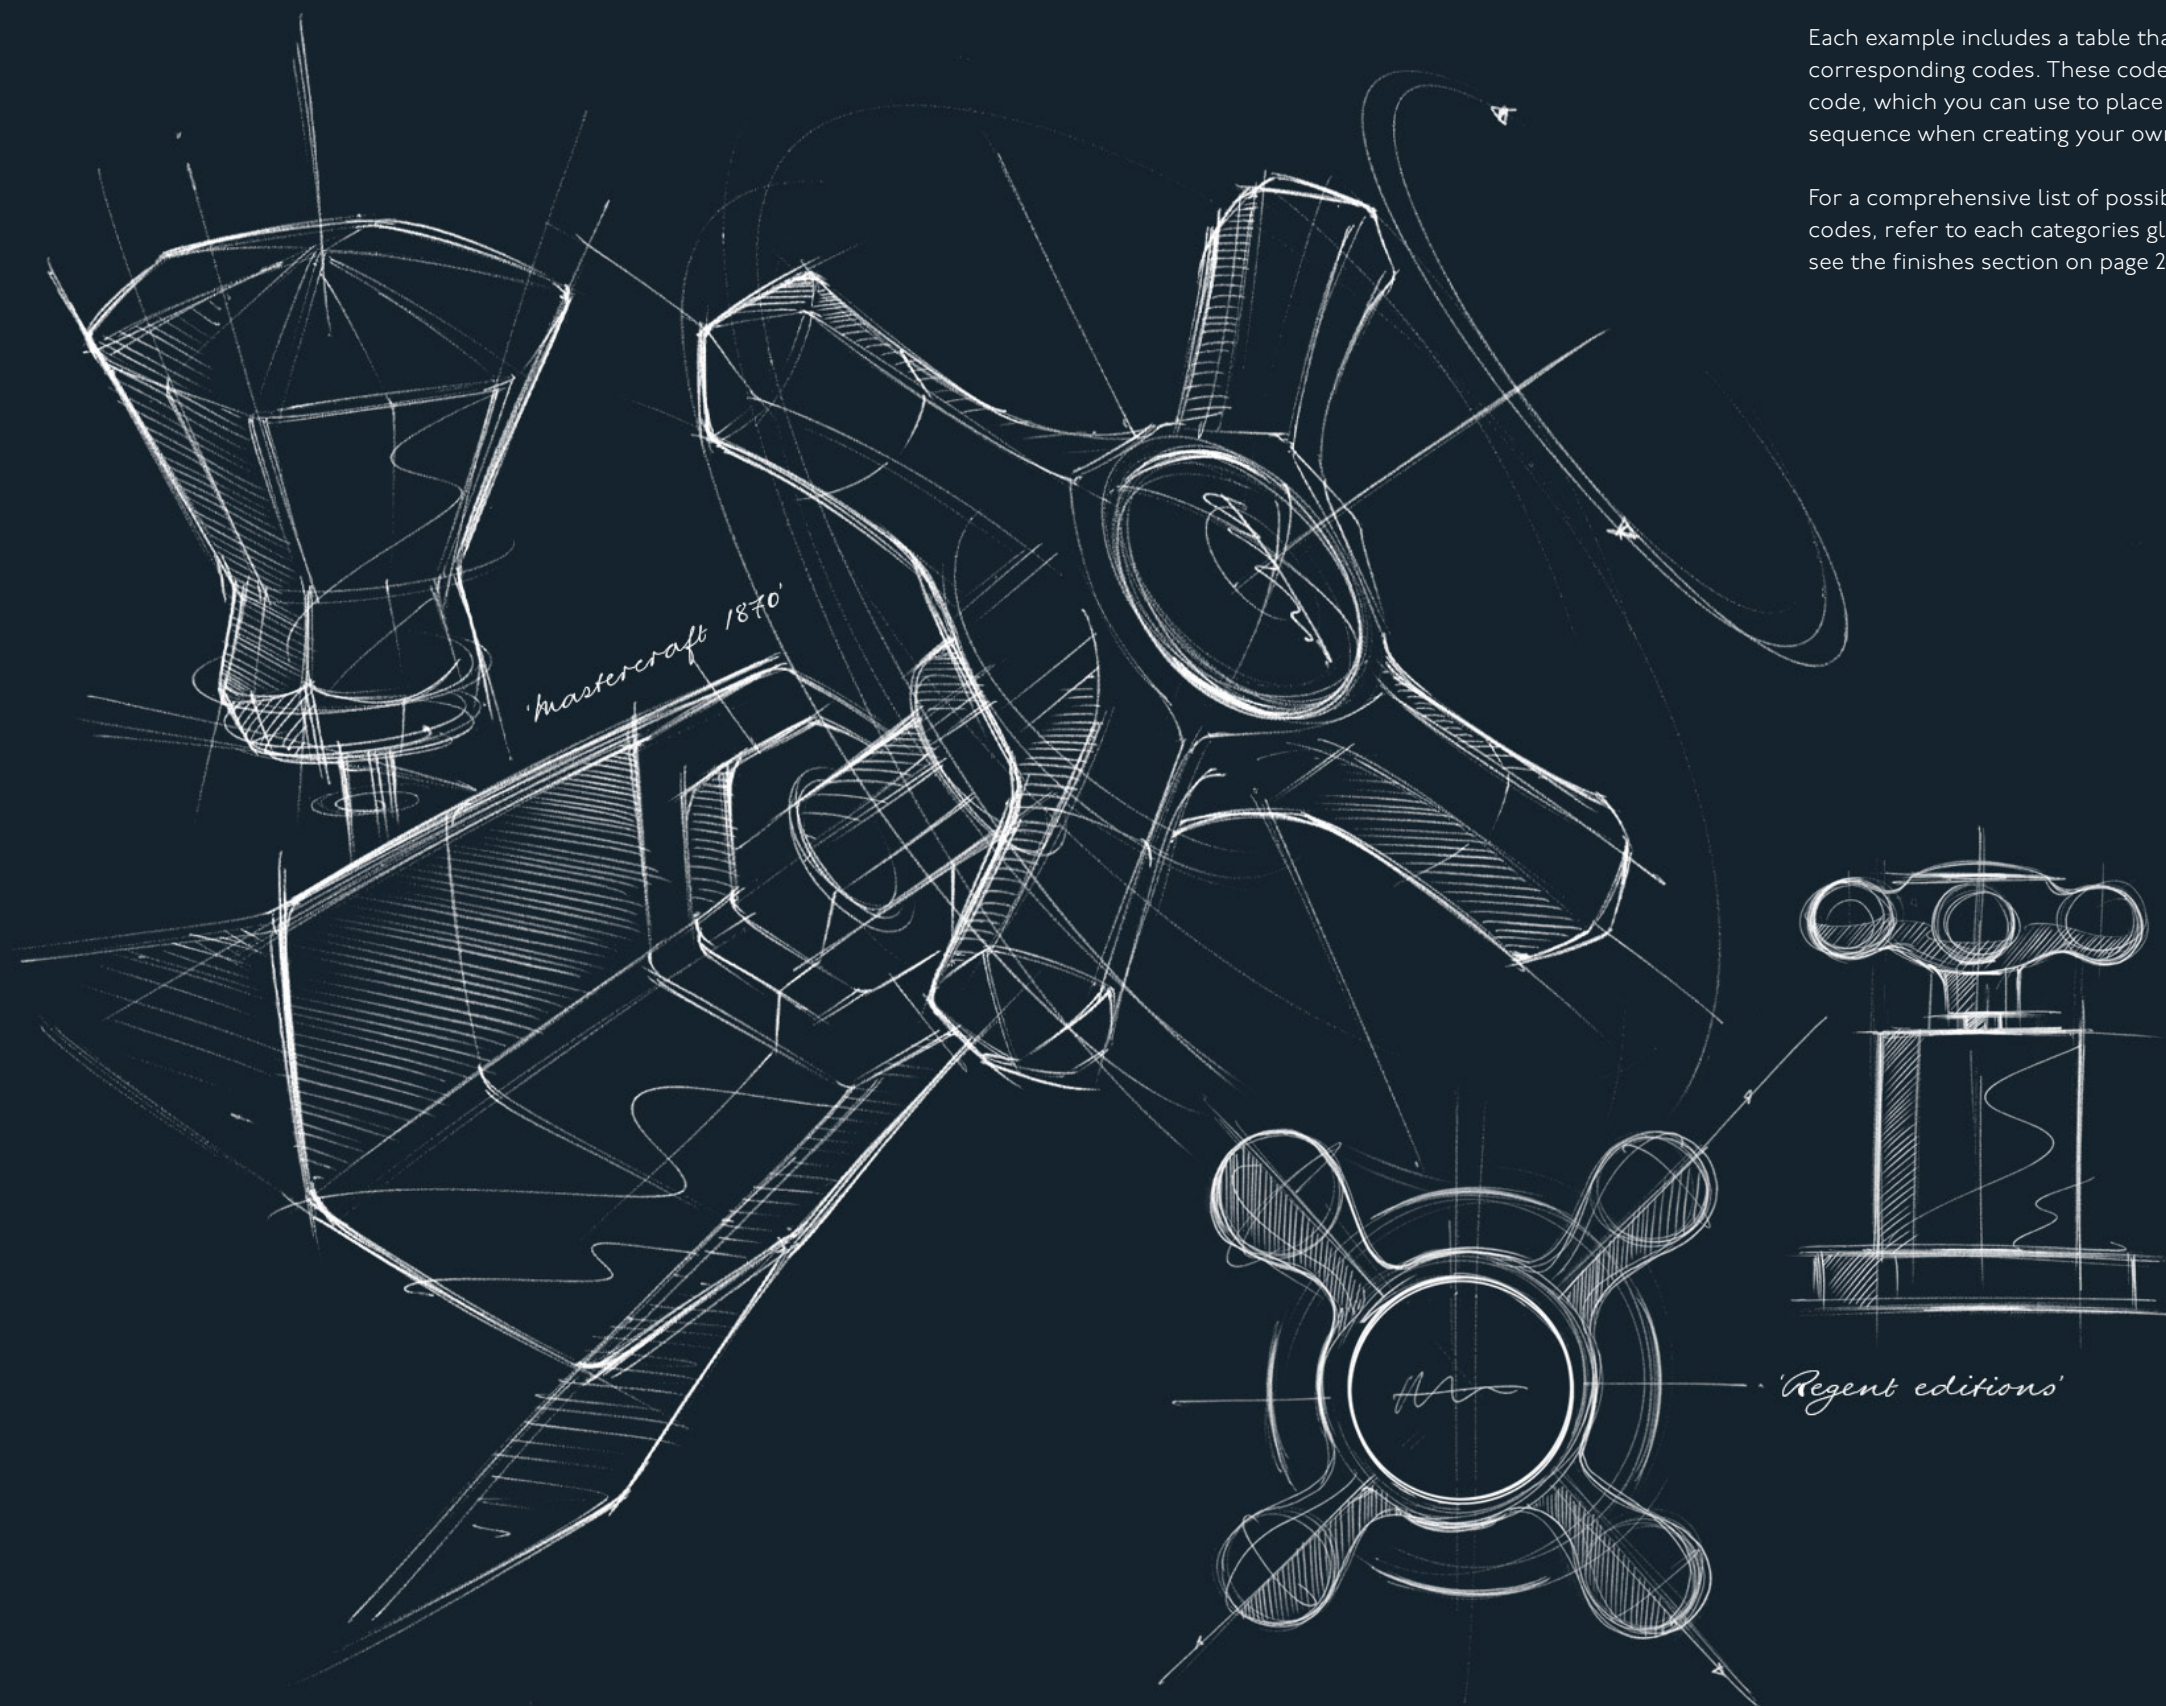

Brushed Inca is created by hand brushing to achieve a warm tone that deepens in colour over time. For those who wish to retain a factory-fresh appearance, brushed inca is a great alternative to brushed brass as it is more stable but offers a similar look.

Product Codes

Since all of our products are made to order, there are a number of ways to configure them. To customise your order, you will need a specific product code that communicates this to the factory. The following pages contain examples explaining how our product codes work.

Each example includes a table that details the product's attributes and their corresponding codes. These codes are then combined into a complete product code, which you can use to place your order. Please follow this system and sequence when creating your own codes.

For a comprehensive list of possible customizations and their corresponding codes, refer to each category's glossary section. For all of the finish codes, please see the finishes section on page 24.

Basin Taps & Mixers

CATEGORY	DESCRIPTION	CODE
